- **Door can be used as writing desk or rest**
- **Robust metal housing, RAL 3000**
- **Designed for surface mounting**
- **Accessory: DIN A4 fire brigade binder**

Description

The Fire Brigade Map Box FWP-3 is used for the safekeeping of the alarm plans that are needed for a fire brigade operation. The map box offers plenty of room for a binder in the DIN A4 format with a width of 7.5cm. The door of the Fire Brigade Map Box FWP-3 can be pulled down, thus also serving as a writing desk or as a place to put the plans.

The powder coated metal cabinet is designed for wall mounting and, according to TRVB O 119, has to be mounted in the main approach route of the fire brigade.

The map box is provided with a standard manual call point lock. Alternatively, a cylinder for steel sheet mounting can be installed. The housing comes with a key.

The red fire brigade binder FW-ORD/A1 in the format DIN A4 is available as an accessory, which is used for filing all documents needed by the fire brigade in a clear way. The binder contains index sheets and a printed cover sheet.
